SCHILLING – an international team for international customers

We speak different languages, are familiar with many cultures and pull together with a clear vision! Our ability and our claim to adapt to customer requirements makes the entire **SCHILLING Kran- und Hebetechnik** team a competent partner around the globe. You can feel it, the passion that goes into every order, the commitment in the search for a technical solution. The **SCHILLING** team makes it possible – no matter where our aluminum gantry cranes, tripods, multilifts, slewing jib cranes and various lifting beams are headed.

Our colleagues from Lake Constance, other regions of Germany, Iran, India, Romania, Kazakhstan, Russia, Greece, Kosovo and Kyrgyzstan stand together, work together and have internalized one thing – the typical Swabian and German

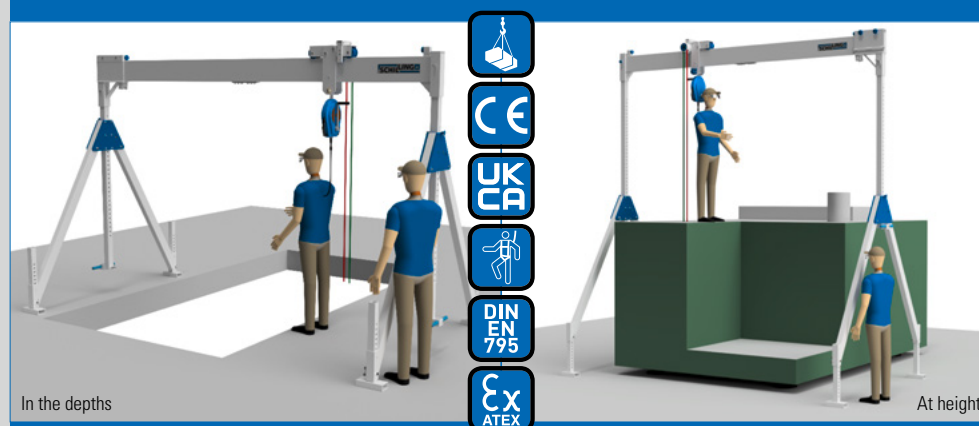

thoroughness, combined with the cultural roots of their respective homelands – a great combination! The world around us is becoming increasingly complex and opaque – but we not! We are characterized by a combination of down-to-earthness and international expertise. We attach great importance to reliability and clarity in communication, high delivery readiness, quality and individual support.

Whether the delivery of our products are sent from Friedrichshafen to Stuttgart, Greenland or Chile – **SCHILLING** makes it happen! So you can continue to look forward to solid cooperation. We are at home on beautiful Lake Constance and on the international stage.

THANK YOU for 25 years!

ALL standard SCHILLING aluminium gantry cranes are tested and approved for material handling and personal safety

Securing persons against falling – the SCHILLING aluminium gantry crane as an anchorage device according to EN 795:2012

Securing people against falling – the SCHILLING aluminum gantry crane as a flexible aid

All SCHILLING aluminum gantry cranes in standard design are certified and approved for securing persons. The person can secure themselves directly to the trolley with a “personal protective equipment”. The perfect solution for applications at depth and height. Any rescuers can also secure themselves to the trolley.

SCHILLING aluminum gantry cranes are type-tested as anchorage devices.

Lifting loads – Securing people!

SCHILLING aluminium gantry crane with electrically movable trolley – THE PLUS in handling

The electrically movable trolley makes the alu gantry crane even more flexible:

▲ for vertical movement of the load: lifting ▲ lowering ▼ □ to move the load horizontally on the aluminium beam ↔

The electrically movable trolley is available for all standard cranes:

stationary version	single beam	load capacity	500 kg 1,000 kg 1,500 kg
stationary version	double beam	load capacity	500 kg 1,000 kg 1,500 kg 2,000 kg 3,000 kg
mobile under load	single beam	load capacity	500 kg 1,000 kg 1,500 kg
mobile under load	double beam	load capacity	500 kg 1,000 kg 1,500 kg 2,000 kg 3,000 kg
mobile under load	double beam	suspension point at the bolt of the trolley max. 5.50 meters	
mobile under load	double beam	(load capacity)	500 kg 1,000 kg 1,500 kg 2,000 kg 3,000 kg

Heavy loads, moved easily.

It's never been easier. The SCHILLING aluminum gantry crane is now also available with an electrically movable trolley. The electric drive makes handling heavy loads very easy and effortless.

The load can be moved precisely and positioned exactly.

The electrically movable trolley in action!

High – higher – even higher!

SCHILLING
alu gantry crane –
the ideal solution
for demanding
tasks and projects

Aiming high with the SCHILLING aluminum gantry crane!

With very high and large components, machines or materials, conventional crane systems often reach their limits. With a load capacity of up to 3,000 kg, the impressively dimensioned aluminum gantry crane with a maximum suspension point of 5.50 m clearly sets new standards and thus considerably expands the range of applications.

Suspension point at the bolt of the trolley

▲ max. approx. 5.50 meters

Beam length

▲ 8 m with load capacity 1,000 kg | 1,500 kg | 2,000 kg

▲ 6 m with load capacity 3,000 kg

Seehasenfest ...

You have to be from Friedrichshafen to feel what this is all about.

The Seehasenfest is a highlight for young and old. We have been familiar with it since childhood, we are part of it.

We celebrate our children's and local festival - the highlight of our town. As true "Häflers", we are of course right in the middle of it, traditionally like every year.

ALL AT A GLANCE: www.schilling-fn.de/en/news

Football connects!

Congratulations to the European champion Spain.

EM 2024 – a team for Germany

We fought and achieved a lot, both athletically and personally.

We stand together, on the pitch and as fans, for our country and our sport.

For us, too, the performance of the team and the spirit of our team are crucial.

We also face international competition and are globally successful!

The Olympic idea...

From one emotional sporting event to the next. The world comes together in sport - we are excited, each of our colleagues for their own country. It's about performance and international comparison around the world, but it's also about sporting fairness and respect for others. Principles that are also ours.

SCHILLING aluminium gantry crane in use

AIRPORT – Maintenance work

Vibrant life at the airport, passengers rushing from gate to gate. Escalators and treadmills are as indispensable as they are self-evident. The reliability of these systems is therefore crucial, which is ensured through regular maintenance and care. The best tool – a flexible and quickly ready-to-use SCHILLING aluminum gantry crane that can be adapted precisely to local conditions.

The result is minimal downtime and a quick restart of the transport aids.

FLOATING PONTOON BODY as a work and pump platform

Lifting heavy loads on unstable ground, in the middle of a quarry lake.

When handling heavy pump elements, the SCHILLING aluminum gantry crane provides invaluable services; handling becomes effortless and easy – a big PLUS in terms of work safety in this difficult environment. The adaptability of our crane during construction is also important; the pontoon bodies change size and our system adapts.

ENBW ULTRA-FAST CHARGING STATIONS –

assembly equipment The expansion of electromobility has to happen quickly. The ideal solution for assembly: the SCHILLING aluminum gantry crane. Easy to transport from A to B, quickly assembled and ready for use in just a few steps. The weight of the charging stations is not a problem. By using our crane systems, the overall assembly time could be significantly shortened and costs could therefore also be reduced. A real win-win situation for everyone involved. We are pleased to be part of the expansion of e-mobility in Baden-Württemberg.

NEUPERLACHER EINKAUFSPARADIES Roof renovation

A shopping paradise that has been established for decades ensures the best shopping atmosphere.

To keep it that way, the multi-ton refrigeration system on the roof of the building had to be lifted and relocated.

At the top, very heavy... a case for the mobile aluminum gantry crane from SCHILLING.

Lift it up, move it to the new location under load, done. Tight spaces, transporting it to the roof is no problem. Small transport dimensions, assembled in just a few steps. Perfect.

25 years of SCHILLING – the team goes on a journey!

What better way to celebrate cohesion and team spirit than on a trip together – on the occasion of our 25th anniversary. Some of our colleagues have been "on board" for a long time. We live on the shores of Lake Constance, one of the most beautiful regions in Germany: so it made sense for us to "set sail". Early in the morning we set off from Immenstaad, "cast off" towards Konstanz, where we had to change to a flatter ship due to the currently very high water level – the Rhine bridge was only passable to a limited extent – our destination: the famous **island of Reichenau**, located in the middle of western Lake Constance.

It's a lovely world of its own, bathed in water. The three medieval churches are venerable guardians of the island. They once belonged to the Reichenau monastery, where Benedictine monks achieved outstanding achievements. They have long been a UNESCO World Heritage Site. In between, vegetables, herbs and wine thrive in the nurseries, fields and vineyards. And with every ringing of the bell, the triad of this special but completely calm island world sounds: naturalness, authenticity and approachability.

Wonderful weather, unique nature, the drive along the Seerhein and the Swiss shore, the nature reserve on the German side – a dream. Experience the island of Reichenau: After the tour through the St. Maria and Markus Minster with its treasury and monastery garden, it was time to go from history to present-day water fun. On a reserved section of the beach we went out on the water with SUPs and canoes, at the same time the **SCHILLING** Beach Party took place on the shore in the chill-out area with deck chairs, seating, drinks and snacks – this is how wonderful a wonderful day on and on Lake Constance can be!

The question of who has the best team in the world is not only easy to answer after a day like this: WE!

At this point I would like to say **THANK YOU** for 25 successful years together! You are great.

Andin

What happened 25 years ago? ... a small excerpt

1999

Lake Constance overflows its shores, a once-in-a-century flood floods many of the lake's shores, and many ports are no longer operational.

Successful repair of the Hubble space telescope.

Steffi Graf announces retirement from professional tennis.

Nobel Peace Prize for Doctors Without Borders.

The summer hit of 1999: "Mambo No. 5" by Lou Bega.

SCHILLING „in a glimpse“

more than 1,500 Tripods

more than 25,000 Gantry Cranes

more than 1,000 Multilifts

more than 500 Slewing Cranes

more than 3,000 Various Lifting Beams

more than 4,000 Custom-made Products

Summer greetings from Friedrichshafen

07/2024

Greetings from summery Lake Constance. We live and work where others go on vacation – at the birthplace of the Zeppelin, now the location of many high-tech companies.
